PRONUBEN BABY LF

LF

Pronuben baby

Pronuben Baby LF (Lactose-Free) is the complete and balanced nutritional solution for infants from birth to 12 months with lactose intolerance.

Crafted with the highest expertise, Pronuben Baby LF is a lactose-free formula enriched with DHA, specially formulated for infants. This unique formula offers a complete nutritional solution, ensuring the well-being of babies during critical stages of their development.

Pronuben Baby LF provides essential nutrients necessary for optimal growth, a strengthened immune system, and healthy cognitive and physical development from birth to 12 months of age. Its easily digestible formula, combined with fortified ingredients, gently cares for babies' digestive systems, ensuring smooth and discomfort-free feeding from day one.

INGREDIENTS

Maltodextrin, vegetable oils (palm, palm kernel, rapeseed, sunflower, and high oleic sunflower), **whey protein concentrate**, **calcium caseinate**, minerals (monocalcium phosphate, potassium chloride, trisodium citrate, calcium hydroxide, disodium phosphate, magnesium sulfate, potassium citrate, potassium hydroxide, ferrous sulfate, chromium chloride, zinc sulfate, sodium molybdate, copper sulfate, manganese sulfate, potassium iodide, and sodium selenite), **fish oil** (source of DHA), emulsifier (**soy lecithin**), vitamins (C, E, A, B3, D, pantothenic acid, biotin, K, B6, B1, B2, folic acid, and B12), choline chloride, inositol, L-carnitine, and nucleotides (cytidine 5'-monophosphate, disodium uridine 5'-monophosphate, adenosine 5'-monophosphate, disodium inosine 5'-monophosphate, disodium guanosine 5'-monophosphate). Antioxidant (mixture of tocopherols).

COMPLETE NUTRITION

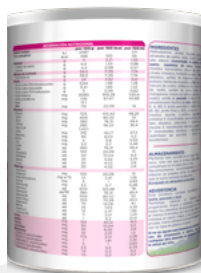

Lactose intolerance is a common challenge in modern societies, and its incidence is increasing. For this reason, a complete and tailored formula has been designed to address this situation effectively.

Proteins: Lactose intolerance is a common challenge in modern societies, and its incidence is increasing. For this reason, a complete and tailored formula has been designed to address this situation effectively.

Carbohydrates: The carbohydrate ratio makes it an ideal option for babies with lactose intolerance, and the presence of **maltodextrin** facilitates its digestion.

Fats: It contains linoleic acid, alpha-linolenic acid, and **DHA** in adequate quantities, essential for the development of the baby's brain and nervous system.

Minerals and vitamins: With 14 minerals and 13 vitamins, our formula ensures complete nutrition. Additionally, it **includes choline, taurine, L-cysteine, and 5 nucleotides**, essential nutrients for the growth and development of the baby.

PRONUBEN BABY LF (Lactose free)

PRODUCT FOR SPECIAL MEDICAL USE

Specialized formula:

Pronuben Baby LF is an exclusive formula for special medical use developed specifically for babies with lactose intolerance. Our combination of carefully selected ingredients ensures optimal nutrition and helps alleviate symptoms associated with this condition, providing babies with the best opportunity for healthy growth and development.

With DHA:

Docosahexaenoic acid (DHA) is an essential component for cognitive and visual development in babies. The importance of this omega-3 fatty acid in early brain and eye growth is paramount. That's why Pronuben Baby LF lactose-free formula is enriched with adequate amounts of DHA, ensuring that each serving contributes to optimal development in babies.

Quality and assurance.

Each batch of Pronuben Baby LF undergoes comprehensive testing in specialized laboratories to ensure its safety and quality. European quality controls span from raw material selection to the final product, ensuring that each unit meets the highest standards of excellence.
